## Power on your camera

Connect the USB cable to the camera and power supply, and connect the power supply to a 230V power outlet.

### Important

It is possible to use a longer USB cable or a USB extender cable for optimum placement of your IP camera.

If you use a different cable than the original, please make sure that the cable is of good quality to ensure stable power delivery.

# VIEWONHOME

## Set the camera for pairing

1. Press the black reset button for 10 seconds until the front red LED starts blinking.

# VIEWONHOME

## Connect via the APP

Open the ViewOnHome APP

1. Select the IPC mode from the ☰ menu
2. Press the + in the top right corner
3. Select Wifi Connect
3. Login to your Wifi
4. The pairing process will now begin

### Important

Make sure your smart phone is connected to Wifi before pairing.  
Smart phone and IP camera shall be on the same Wifi.
